PROFILE

I am a third-year Information Technology undergraduate at the Sri Lanka Institute of Information Technology (SLIIT). I am interested in full-stack web development and have experience creating web applications that work well on different devices and are easy to use. I have worked with both front-end and back-end technologies. At present, I am improving my knowledge of front-end development, back-end development, databases, and APIs. I am looking forward to working with a software development team to gain practical industry experience as a Full- Stack Web Developer.

WORK EXPERIENCE

Web Designing and Development, Freelancing

2023 - Present

- Developed responsive user interfaces using HTML, CSS, and JavaScript, ensuring cross-browser compatibility.
- Built dynamic web applications using React and integrated APIs to display real-time data.
- Collaborated with a team using Git and GitHub, managing version control and resolving merge conflicts.

EDUCATION

• **Bsc.Hons in Information Technology Specializing in Information Technology**
SLIIT

Oct 2023 - Present

• **Advanced Level Examination, Physical Science Stream**
Senanayake Central College, Madampe
Combined Maths / Physics / Chemistry

Oct 2020 - Aug 2022

CERTIFICATES

- Python for Beginners - University of Moratuwa
- Web Development for Beginners - University of Moratuwa
- Front-End Web Development - University of Moratuwa
- AI/ML Engineer Stage 1 and Stage 2 - Sri Lanka Institute of Information Technology (SLIIT)

TECHNICAL SKILLS

- **Programming Languages** - Java, JavaScript, Python, C++, C
- **Frameworks** - React, Springboot
- **Web Technologies** - HTML, CSS, API Testing using Postman
- **Databases** - MySQL, MongoDB
- **Methodologies** – Agile, SCRUM, SDLC, STLC
- **Testing Experience** - Writing test cases and test scripts, Familiar with Regression Testing, Functional Testing, UAT Testing

SOFT SKILLS

- Leadership
- Good Communication
- Critical Thinking
- Quick Learning
- Fast adapting to new technologies
- Good practice in Agile and SCRUM environments

PROJECTS

- **Optical Management System (Web Application)**

Developed a complete optical management system to handle customer records, product management, sales processing, supplier management, and report generation. The system supports inventory control, sales tracking, and supplier coordination, ensuring efficient daily operations and accurate business reporting.

Front end - HTML/CSS || Backend - PHP || Database – MySQL

Git Hub Link - https://github.com/sasangihasadara/Optical_System

- **Smart Bag Management System (Web Application)**

Built a web-based smart bag management system to monitor bag details, track usage information, and manage related records efficiently. The system includes secure user access, real-time data handling, and scalable management of bag information and activity logs. Delivered a user-friendly interface and a reliable backend to support accurate tracking and smooth system operations.

Git Hub Link - <https://github.com/sasangihasadara/Smart-bag-system>

- **Online Vehicle Service and Fuel Station Management (Web Application)**

Developed a web-based vehicle service and fuel station management system to streamline service scheduling, fuel stock monitoring, and customer record management. The system supports secure user authentication, real-time service and fuel tracking, and efficient handling of vehicle maintenance records. Implemented a responsive user interface and a reliable backend to ensure smooth operations, accurate data management, and improved overall service efficiency.

Front End - HTML, CSS, JavaScript, JSP | Back End – Java (Servlets) | Database – MySQL

Git Hub Link - <https://github.com/sasangihasadara/Online-Vehicle-Service-and-Fuel-Station-Management-System>

- **Wellness App (Mobile App)**

Developed a mobile-based wellness application to help users maintain healthy daily habits and improve overall well-being. The app enables users to track daily activities, monitor moods, and receive hydration reminders through an interactive and user-friendly interface. Implemented features such as habit tracking, mood journaling with emoji-based entries, and notification-based reminders to encourage consistency and positive lifestyle changes. Designed a clean and responsive UI while ensuring smooth performance and efficient local data management.

Technologies - Android Studio, Kotlin, Android SDK, SharedPreferences, Notifications, AlarmManager

Git Hub Link - https://github.com/sasangihasadara/Wellness_App

- **Online examination system (Web Application)**

This is an online examination system that allows students to attend examinations from anywhere. Users can log in to the system, view available exams, attempt questions within a given time, and submit their answers online. Administrators can create exams, manage questions, and view results efficiently. The system is built using SQL for database management, ensuring secure and efficient handling of user, exam, and result data.
